

SCHOOL OF COMPUTER ENGINEERING

PRESENTS

LUMINAIRE

LUMINAIRE

ALAN TURING

"A computer would deserve to be called intelligent if it could deceive a human into believing that it was human."

“ Celebrating the mind, escalating breadths of time and the heights of the undiscovered, we welcome the tiniest flare of innovation, the smallest riple of the legend, we invite you to the Luminare. ”

VISION

TRAVELLING THROUGH THE MIRAGES OF TIME, TODAY WE STAND AT A SUMMIT WHERE OUR LIFE IS INFUSED WITH THE VAST DYNAMICS OF TECHNOLOGY. FROM A MERE CLOCK SITTING ON OUR STUDY TABLE TO THE MULTI MILLION MACHINES SPEWING GREEN NOTES, WE STAND AND BREATHE IN THE WORLD OF THESE SIMPLE, YET FANTASTIC GIZMOS. EVER WONDERED WHO INJECTED THEM INTO OUR LIVES? NO, IT WASN'T A SHOOTING STAR OR HEAVEN'S ANGEL WHO INTRODUCED US TO THESE BEAUTIES. THEY WERE JUST COMMON PEOPLE OR SHOULD I SAY MUNDANES WITH MAGIC IN THEIR HEARTS AND INNOVATION IN THEIR SOUL WHO FOLLOWED THEIR DREAMS TILL THE END AND GIFTED US WITH THIS GIGANTIC PLETHORA OF TECHNOLOGY. IT WASN'T JUST PASSION THAT DROVE THEM TO THE PINNACLE OF SUCCESS, IT WAS THEIR VISION EMBEDDED WITH A HIGH DOSE OF INNOVATION AND PURPOSE THAT ENABLED THEM TO TOUCH THE EPITOME OF TECHNOLOGY.

WITH THIS EVENT, WE WISH TO COMMEMORATE THE GREATNESS OF THESE TECH TYCOONS WHO ENLIGHTENED THIS PATH OF EXUBERANCE AND SHOWED US THE GIFT OF LIBERTY TO IDEATE AND INNOVATE TO ACHIEVE THE BEST. TO CELEBRATE THE REVOLUTION OF IDEAS AND THE FORTUNE OF VISION, LET'S TAKE THE PLUNGE TO ENJOY AND LEARN.

LUMINAIRE

DR. ACHUTYA SAMANTA

MISSION

To create, inspire, motivate and mentor more "Dr. Samanta" like minded individuals from our university and all around the world through this process.

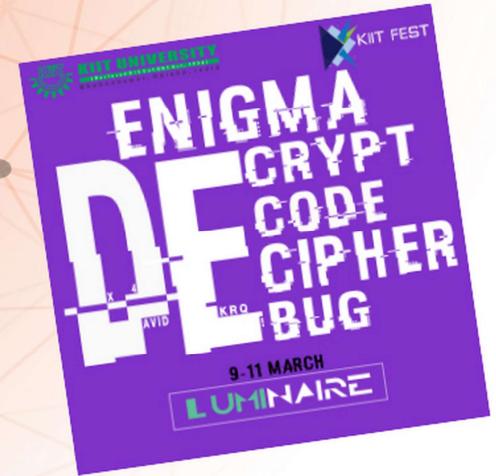

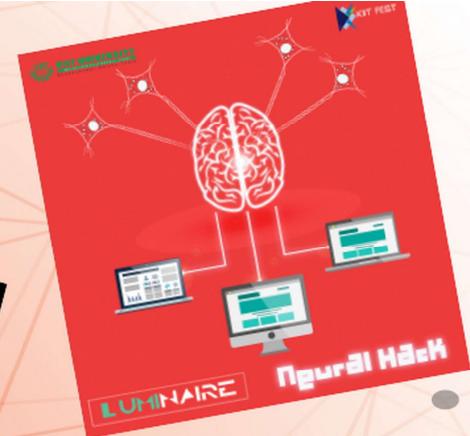

From the Neanderthal times to the modern tech savvy era, from creating fire to developing PARAM, the one parameter which has developed through ages is the Human Brain.

This journey has been marked by the milestones set by our major tech giants. Our ultimate mission is to celebrate their veneration and wonders of their grey cells. To create a developing environment for nourishing the minds and to find the ones ready to face the challenges of the 21st Century.

KIITFEST

LUMINAIRE

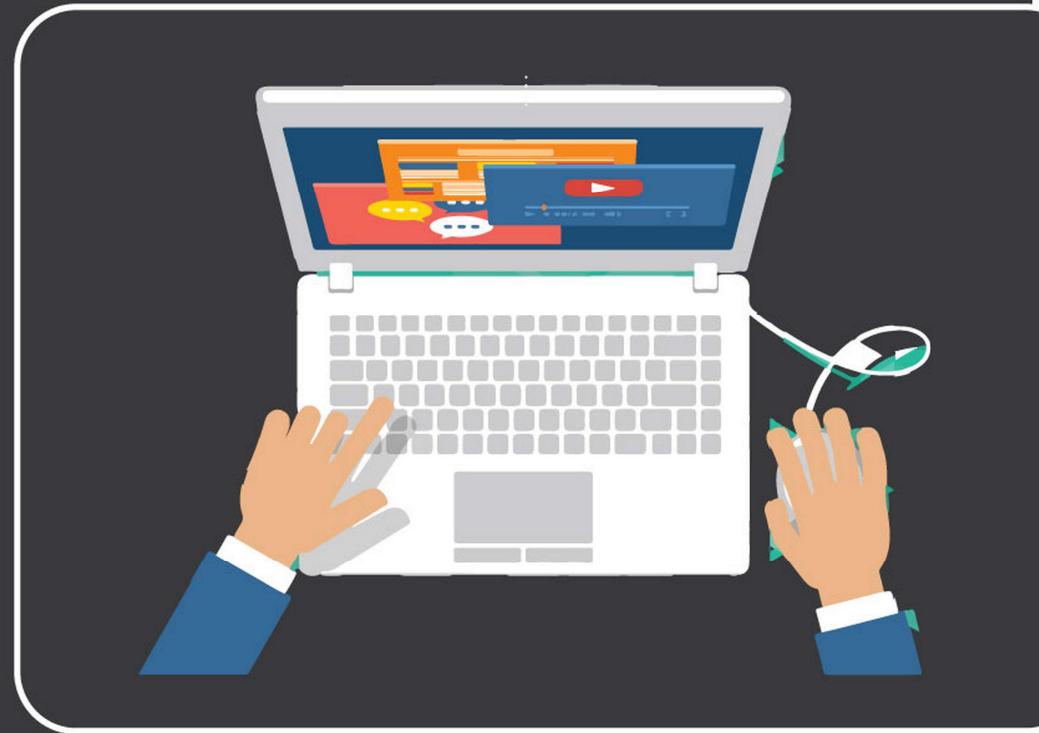

LUMINAIRE

Presents

Enigma & Clash of Coders

A tech event where participants will be needed to implement debugging ideas. This event will test the cryptographic and techie minds of students.

Participants battle through a series of buggy codes to find the bugs. Good presence of mind and sharp skills are needed to get to the top. The best and the fastest to debug wins

LUMINAIRE

Presents
Web Wizards
& App Wizards

This is a Web and App Development Hackathon wherein the participants need to develop a website or an app as suitable right from scratch. The participants will be checked for creativity, innovation and their problem-solving skills. Participants will be working in a stipulated time environment to solve a theme based problem.

LUMINAIRE

Presents

Tech Treasure Hunt

A tech event where participants will be needed to solve real world problems which are encountered in almost any good project. Especially Machine Learning projects require data collection from web, preprocessing of data and finally applying Machine Learning algorithms. This event will test the efficient problem solving skills for Projects and Automated testing and tasks.

LUMINAIRE

Presents

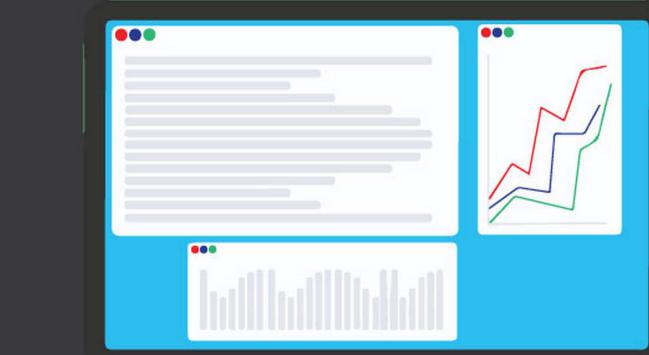

Workshops On
Data Analysis & Machine Learning

"The art and science of making sense of data is a highly sought after skill in today's data driven world."

Interested in Artificial Intelligence? Predict the future with Machine Learning! Fascinated with data sets and drawing conclusions about the information they contain? Learn Data Analytics and discover the knowledge of power.

Luminaire brings you two prodigious workshops on

1. Data Analytics and
2. Machine Learning

LUMINAIRE

Presents

BattlePit

Games like Counter Strike v1.6, Fifa 12, Dota 2 which have been ruling the gaming world for quite a long have finally arrived in Luminare.

Introducing mobile games this year with Clash of Clans.

Participant team can win through competing in the tournaments.

LUMINAIRE

Presents

RoboWars

Build the beast you
can to destroy
other robos by
modifying them.

Last man standing
will be victorious.

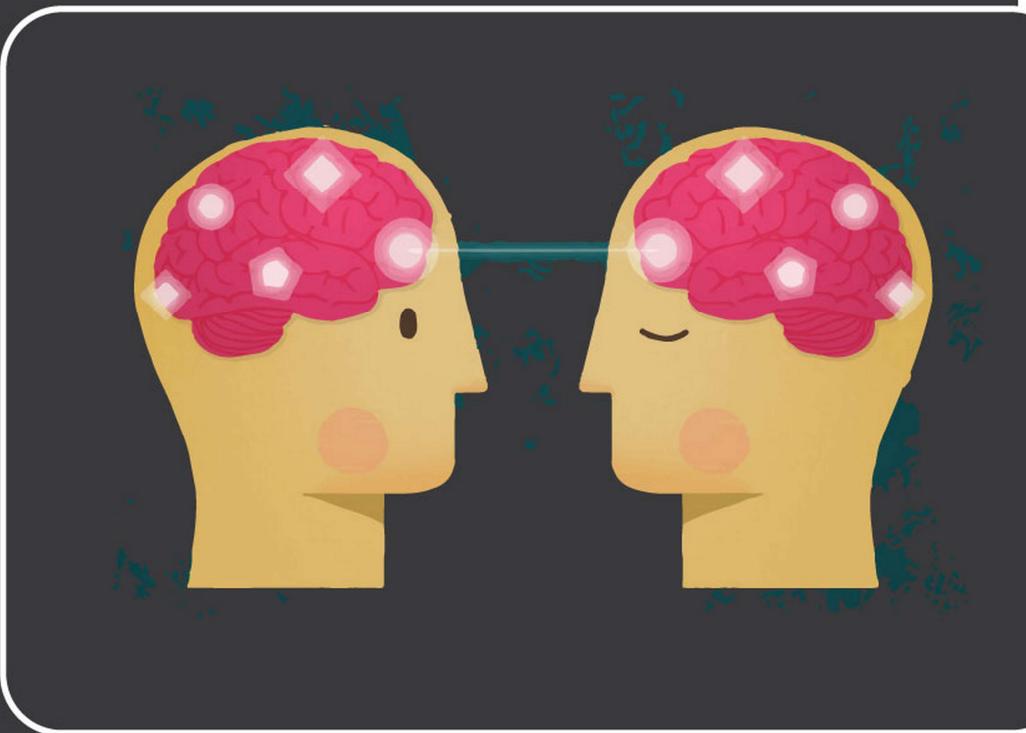

LUMINAIRE

Presents

Neural Hacks

A tech event where participants will be needed to solve real world problems which are encountered in almost any good project. Especially Machine Learning projects require data collection from web, preprocessing of data and finally applying Machine Learning algorithms. This event will test the efficient problem solving skills for Projects and Automated testing and tasks.
